RDMP "Endogenous group formation and responsibility diffusion"

Will you be submitting this form to a funder?

No.

1a. What data will you be collecting, generating or reusing?

Experimental choice data collected at the CREED laboratory

1b. How much data will you approximately collect or reuse?

50mb

2. Where will the data be stored during the research project?

On surfdrive and copies of the data of each experimental session are sent to
creedexperimentdata@gmail.com and all co-authors of the project.

3. How will the data be organised, described and documented?

The data from all experimental sessions is collected and saved in one .dta file on figshare, variables are described in a codebook.

4. What are the main risks to data security?

Breach of privacy, loss of data, data manipulation

5. What measures will be taken to mitigate the risks?

Data is anonymized, stored in multiple locations, all authors have access to data and a copy of the data is immediately sent to creedexperimentdata@gmail.com.

6. Who will have access to the data?

Katharina Brütt, Joep Sonnemans, Arthur Schram

7. Will you use non-digital data?

No.

8a. After your research project has ended, what data will be archived and in what format?

The choice data from the experiment.

8b. Retention period(s):

The data is stored indefinitely.

9. Where will you archive your data?

Figshare

10. What metadata standard will be used?

A codebook describing all variables

11. What documentation and/or software code will be deposited with the data?

A codebook describing all variables.

12. What data will be published as outputs from the project and when?

The data itself is published on fisgshare, results based on the data are published in
https://doi.org/10.1016/j.geb.2020.02.003.

13. If you are not publishing (a selection of) your data, what is the reason?

Not applicable

14. If you are publishing (a selection of) your data, where will you publish your data?

Not applicable

14b. What (license) conditions will apply to the data you will publish?

CC BY 4.0 license

15. Apart from the UvA RDM policy and UvA ICT security policy, what other policies at the University of Amsterdam and partner institutions apply?

None

16. Which of the following agreements are required?

None

17. Are all required resources available?

Not applicable
